Education

Indian Institute of Information Technology, Kottayam

Bachelor of Technology in Computer Science and Engineering

Nov. 2022 – Apr. 2026

(CGPA : 8.0)

Rajasthan Board of Secondary Education

High School

July 2019 – Apr. 2021

(Grade : 98%)

Technical Skills

Programming Languages: Python, Java, JavaScript, C++, C, SQL

Frontend Technologies: React, Net.js, Tailwind css, Redux, AngularJS, HTML5,

Backend Technologies: Node.js, REST APIs, GraphQL, Python (Flask, FastAPI)

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Linux

Databases & Tools: MongoDB, PostgreSQL, MySQL, Git/GitHub

Course Work: Data Structure, OS, Computer NetWork, OOPS, DBMS, Machine Learning

Deployment Tools: Vercel, Render, Netlify

Work Experience

software Developer — Elite8 Digital

Nov '25 - present

TechStack: React, Node.js, MongoDB, HTML5, Tailwind CSS, vercel

Remote

- Engineered and optimized interactive, responsive web interfaces using React.js, Node.js, and modern CSS frameworks, delivering a high-performance and consistent UX across all platforms and devices.
- Integrated and synchronized frontend-backend communication via Axios and RESTful APIs, collaborating closely with cross-functional teams to debug, refactor, and enhance system efficiency and reliability.
- Diagnosed and mitigated performance bottlenecks, improving data flow, rendering speed, and application stability through code optimization and strategic debugging.

Projects

FarmStack AI | *React, Tailwind CSS, FastAPI, MongoDB, TensorFlow, Redis, Cloudinary, Framer Motion,*

- Engineered a full-stack AI platform using React, FastAPI, and TensorFlow, empowering farmers to detect 38+ crop diseases through real-time image analysis with 90%+ model accuracy.
- Architected a scalable backend with JWT authentication, MongoDB, Redis caching, and Cloudinary, processing 54K+ labeled images and serving real-time predictions via Dockerized microservices.
- Implemented an end-to-end ML pipeline with advanced augmentation (MixUp, CutMix) and containerized deployment using Docker & Nginx, achieving low-latency inference and production-grade reliability.

Blog-app | *Next.js 15, Prisma, Clerk, Cloudinary, React Server Components* [Demo Link](#)

- Developed a full-stack blogging platform using Next.js 15, TypeScript, and PostgreSQL (Prisma ORM) with Clerk authentication and Cloudinary integration, enabling secure content management for 100+ active users.
- Designed and deployed a responsive dashboard using Tailwind CSS and Radix UI, achieving a 35% faster load time and ensuring seamless usability across 320px–1920px devices.
- Implemented interactive features including a rich text editor, real-time like/comment system, and Web Share API integration, boosting user engagement by 40% and improving overall content discoverability.

Achievements and Extra Curricular

LeetCode

Aug 2024 – Present

- Solved 350+ complex problems, demonstrating strong proficiency in data structures and algorithms.
- Maintained a 100+ day streak of solving daily problems and achieved 210+ total active days.

CodeChef

Sep 2023 – Present

- Achieved a 3-star rating (Max Rating: 1610+), solving 300+ problems of varying difficulty levels.
- Secured a global rank of 260 in CodeChef Starters 177 Division 3.

Hackathons

- Finalist in **HackOverflow Hackathon** and **Smart India Hackathon (SIH)** — developed innovative full-stack solutions addressing real-world challenges among top shortlisted teams nationwide.
- Collaborated in a 4-member developer team, building scalable prototypes under tight deadlines, showcasing strong problem-solving, teamwork, and innovation skills.

Adavya Fest

- Gathered feedback from 100+ attendees to improve event structure and scheduling, enhancing user experience.
- Led volunteer coordination during Adavya, a 3-day game fest, ensuring smooth gameplay and engaging 500+ participants.

Apoorv Fest

- Led a team of 10+ volunteers to organize and manage cultural and technical events successfully.
- Coordinated with faculty and external guests to ensure smooth execution of multiple events.
