Hiring Manager

Dear Hiring Manager,

I am writing to express my interest in the **Software Developer** position. I am currently pursuing a **Bachelor of Technology in Computer Science Engineering**, and I am eager to begin my professional journey with an organization that values innovation, excellence, and strong engineering practices.

Throughout my academic journey, I have developed a solid foundation in **full-stack development**, working extensively with technologies such as **React.js, Node.js, Express.js, MongoDB, REST APIs, JavaScript**, and modern UI frameworks like **Tailwind CSS**. My major projects, including building a complete **full-stack web application using Node.js and MongoDB**, have strengthened my skills in frontend development, backend architecture, database management, and integration of end-to-end features.

These project experiences taught me the importance of writing **clean, maintainable code**, designing efficient system structures, and collaborating effectively within a team environment. I have also gained familiarity with concepts such as cloud computing, authentication workflows, deployment, and version control using Git, which are essential for full-stack engineering roles.

Beyond academics, I actively engage in team-based technical work, which has enhanced my communication, problem-solving, and leadership abilities. I enjoy working in dynamic, growth-oriented environments where learning is continuous and challenges require creativity and precision.

I am particularly motivated to join an organization that encourages building scalable applications, exploring modern technologies, and contributing to impactful real-world solutions. I am enthusiastic about the opportunity to bring my full-stack development skills and eagerness to learn to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how my technical strengths and dedication align with your organization's goals.

Sincerely,

Lokesh Kumar
